## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-7, drawn to Polybutylene terephthalate pellet.

Group II, claim(s) 8, drawn to Compound product, produced using Polybutylene terephthalate pellet.

Group III, claim(s) 11 and 15-16, drawn to Molded product, produced using Compound product.

Group IV, claim(s) 9 -10, drawn to Process for producing Compound product.

Group V, claim(s) 12 - 14 and 17-19, drawn to Process for producing Molded product.

The inventions listed as Groups I -V lack unity of invention because even though the inventions of these groups require the technical feature as Polybutylene terephthalate pellet, this technical feature is not a special technical feature as it does not make a contribution over the prior art in view of Katsuhiko JP 2003 - 073488 ( attached) because , Polybutylene terephthalate pellet , comprising titanium atom in the amount from about 50 ppm ( see paragraph [0007] ) and preferable range of IV ( intrinsic

viscosity) from 0.8 to 2.0 dL/g ( see paragraph [0008]) disclosed by Katsuhiko JP 2003 - 073488 . Note, that language of Claim 1 does not required presence of methoxycarbonyl group and also does not require that intrinsic viscosity of central portion of the pellet will be different than intrinsic viscosity of surface layer of the pellet.

2. A telephone call was made to Mr. Crawford on December 22, 2009 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to GENNADIY MESH whose telephone number is (571)272-2901. The examiner can normally be reached on 10 a.m - 6 p.m.
